I'll touch base with Jennifer again, it's been a while since we've talked but yes, she knows she will be reviewing the General Mills FYR for the State. And will also talk to Shari more about Reilly Tar.

Re PP, that would be great if I could do it before I leave, will just try it. I am also going to sign a set of final Maxiflex forms before I leave, since I'm doing them in Word that is easy and will help if somebody else ends up having to attest in PP for me.

It's getting close now!

Leah

Hi Leah,

Just a few thoughts from your monthly report....

- (1) I assume Jennifer is aware that she is reviewing the General Mills FYR? I haven't heard her mention it, so I just wanted to make sure.
- (2) I can be the contact for Nutting Trucking while you are gone, no problem.
- (3) Go ahead and let Shari know that she may get a request from ORC to review a state opinion on Reilly Tar. We will have her cover that along with the WAM duties.
- (4) We will have to see with the new system, but I think you may have the ability to attest all of your Pay Periods ahead of time. If not, we will make sure that gets taken care of – even if I have to do it.

Thanks,
Tim
